

Stefan P. Schleicher

is Professor at the Wegener Center on Climate and Global Change at the University of Graz, Austria. He serves as a consultant to the Austrian Institute of Economic Research in Vienna.

He obtained his academic degrees from the University of Technology in Graz and the University of Vienna. He held academic positions at the Institute for Advanced Studies in Vienna, the University of Bonn, the University of Pennsylvania in Philadelphia and Stanford University.

His research focuses on economic modeling and economic policy issues with special emphasis on sustainable structures in the context of energy and climate.

His current research activities involve the transition of our economies to high resource-efficient and low-carbon structures, monitoring and analyzing all installations covered by the EU Emissions Trading System, and the evidence of the impact and conflicts of the 2020 and 2030 targets for EU energy and climate policy.

For Austria he is developing based on the sGAIN model perspectives for a low-energy and low-carbon transformation of the Austrian energy system up to 2050 with implications for current policy designs. He coordinated research supporting the preparation of the Austrian Energy Strategy, the Austrian National Renewable Energy Action Plan, and the First and Second Austrian National Allocation Plan for the EU Emissions Trading Scheme.
